School of Nursing

MSN-DNP in

POPULATION HEALTH LEADERSHIP

DNP Degree Program

The MSN-DNP in Population Health Leadership program at New Mexico State University (NMSU) is designed to prepare advanced practice nurses for leadership roles in improving population health outcomes. Our program focuses on developing the skills necessary to lead interdisciplinary healthcare teams, implement quality improvement initiatives, and influence health policy to enhance the health and well-being of diverse populations.

WHY CHOOSE NMSU?

Comprehensive Curriculum
Our curriculum integrates advanced nursing practice with leadership, policy, and population health. Courses cover topics such as quality improvement, health informatics, health policy, and healthcare finance. Clinical practicum experiences focus on leadership development and execution of a quality improvement project.

Distance Education
Although many of our students live in southern New Mexico, our distance education format allows nurses to earn their DNP degree in their hometown while continuing to practice.

Flexible Learning
Designed for working professionals, our online format allows you to balance your studies with your professional and personal responsibilities. Didactic courses are delivered in a flexible, mostly asynchronous format.

Expert Faculty
Learn from experienced faculty members who are leaders in the field of population health and advanced nursing practice. Our faculty are dedicated to providing personalized mentorship and support throughout your academic journey.

Career Advancement
Graduates of our program are equipped to take on leadership roles in a variety of settings, including healthcare organizations, government agencies, non-profits, and academic institutions.
